Jonas Mockus Published in 1989 in Dordrecht by Kluwer. Services. Reference details Bayesian Approach to Global Optimization. Theory and Applications The objective of global optimization is to find the globally best solution of . Nonlinear models are ubiquitous in many applications, e.g., in advanced . For detailed expositions on Bayesian approaches, see Mockus (1989), Törn and Zilinskas (1989), and Mockus et al. For theoretical background, see Forster (1995). Bayesian optimization - Wikipedia, the free encyclopedia Hyper-heuristics for search can be classified into two types (i) heuristic selection, and (ii) heuristic generation [5]. A heuristic selection mechanism has been
